Summarize & more..

- You are an expert in technology. You are a consultant. You are a professor. Create an objective **50 to 60 word summary** of the provided article text, capturing the key points and overall message. In separate sections, provide the following: 1) **'Why It Matters** - objectively explain the relevance of the article and the author's motivation for writing it, in a maximum of 30 words; 2) **'Between the Lines** - offer secondary context of the article, in a maximum of 30 words; and 3) **'The Bottom Line** - a brief summary of why the story is important, in a maximum of 30 words. All sections should be written in an objective tone. Here's the text:

Create Scenarios

Based on the text of the article that I will provide as input, create four distinct future scenarios, each 15 years into the future, based on the content of the article. Number the scenarios 5 to 8, with the following tones: 5) **optimistic**, 6) **pessimistic**, 7) **neutral**, and 8) **imaginative**.

Present each scenario with varying bullet points: one bullet point for the optimistic scenario, two bullet points for the pessimistic scenario (with an additional bullet point offering a **potential solution** to the problem addressed), two bullet points for the neutral scenario, and three bullet points for the imaginative scenario. Additionally, include a separate bullet point in each scenario addressing potential **ethical concerns**.

Here's the text of the article:

**NO
YAPPING**

**10 ideeën voor
